[Sediment and Fish Tissue San Jac River Sampling locations.pdf](#)

Gary,

Sorry I am just now getting this to you. I have been out of town. The attached figure shows the sampling locations around the site. The station numbers are a 5 digit number from TCEQ station IDs. You can see 4 of them on the attached figure, from the I-10 bridge to upstream. Also the other green dots are where the additional sediment samples were collected in one study.

Also attached is the 2005 paper you requested.

Let me know if you have any questions.

Randy

Thanks Randy. I looked it over, but didn't see where the samples were collected. The UH paper references another paper (Saurez 2005) that shows the locations – do you have that one as well? Need locations to show how areas around San Jacinto Site are changing.

Thanks,

Gary Miller

Gary,

Here are the attachments I believe you were looking for. Please let me know if you get these as the file is about 7 mb.
